Yes, I knew the JHAs I used needed to be revised. The safety officer box with the flash drive was missing from the warehouse. I don't know if it was sent on the deployment. That was what I could do with what I had. We need to make sure that the SO box has everything in it, and people are not borrowing things like the flash drive with all the SO files. I looked on <http://www.epaossc.org> and did not find additional JHAs or THAs. I asked David Eppler to help with this and help with setting up a sign in sheet.

You asked if any safety people were deployed. I worked in Addison for about 7 hr on Sunday. Was not deployed to the site.

I am going to work at my desk today unless someone ask for assistance with SO stuff.

No. The RPM JHA is completely different than the OSC JHA and the Water Team JHAs. There needs to be a separate signature page for those deploying in support of Gold King Mine Spill. Please see attached.

A JHA for the Water Team and the OSCs need to be attached. The have a JHA for unknown contaminants, that I have attached.

I wanted Kenneth to add a signature page and he put the RPM jha. Is that the same as the OSC jha and water jha?

Sent from my Windows Phone

Thank you. It looks good. We need to make sure employees who deploy sign it and acknowledge that they read it.

I know Mark Hayes has deployed, but has anyone else deployed? The Water Team? Please ensure that anyone who deploys comes through the H&S Office prior to deploying so that we can ensure they meet their H&S requirements.
